## About the Conference

ILASS-Americas 2006 is the 19<sup>th</sup> Annual Conference on Liquid Atomization and Spray Systems, North and South America. Like previous ILASS conferences, it provides a venue for industrialists, researchers, academics, and students engaged in the scientific development and practice of atomization to meet and share recent developments in the field. Topical areas include theory modeling, and experimentation on liquid breakup processes, and applications in the area of biological and agricultural sprays, combustion systems and engines, deposition processes, coating, and industrial sprays.

## Papers and Posters

Authors must submit their final manuscript as PDF files, following the format given on ILASS-Americas web page<sup>1</sup> before March 6<sup>th</sup>, 2006 for inclusion in the CD-Rom Proceedings. Prospective presenters for the poster session should submit an abstract by April 3<sup>rd</sup>, 2006.

## Social Event

Witness the beauty of one of the seven wonders of the natural world.

## Conference Topics Covered

As in previous conferences, all aspects of atomization and spray processes are covered, including:

- Instrumentation related to sprays for drop size, drop velocity and impact, drop concentration, patternation, film thickness, vapor concentration, etc.
- Modeling of flow phenomena inside and outside of atomizers, including CFD.
- Design, operation and performance of liquid atomizers and spray systems.
- Transfer processes in which liquid sprays are used, such as in spray reactors, spray dryers, humidifiers, spray coating, spray combustion, fire fighting sprays, agricultural applications, pressure back sprays for domestic or medical use, atomization for metal powders and spray forming.
